Reasons for Allowance

The “further clock pulse following said clock pulse” is interpreted in light of the specification at page 7, lines 17-18: “said signal is present at the signal lines of the databus 5 during the following, second clock”. This clock is further identified as provided with the ending “_B” which “means that the signal status in the signal lines of the databus is shown between the databus drivers 3 of the communicating assemblies” (p. 8, lines 18-20). This interpretation precludes the use of the output enable of Lagoy as anticipatory.
